# Sustainable Retail Bags

## Reusable Soft Loop

Crafted from 100% recyclable materials, offering a cost-effective and sustainable alternative to paper bags or single-use thin gauge plastics. Specifications can be tailored to comply with California Senate Bill 270 standards, meeting the ATP-001 standard for reusability.

Moreover, the material can be blended with a mix of post-consumer recycled plastic, depending on customer requirements, and is printed with environmentally friendly inks. To meet ATP-001 requirements, bags must have a minimum thickness of 2.25 mils (55 microns).

## Reusable Punched handle plastic bags

Also produced from 100% recyclable materials, providing a cost-effective and sustainable alternative to paper bags or single-use thin gauge plastics.

Specifications can be tailored to comply with California Senate Bill 270 standards, meeting the ATP-001 standard for reusability.

Additionally, the material can be blended with a mix of post-consumer recycled plastic, based on customer requirements, and is printed with environmentally friendly inks. To meet ATP-001 requirements, bags must have a minimum thickness of 2.25 mils (55 microns).

## Key Specifications
